RE: Jumbo-Jensen Plan Amendment, U. S. Gypsum Company, M/041/008,
Sevier County, Utah

I have attached a copy of the approval letter which I plan to mail to U. S. Gypsum regarding their recent (1-29-90) plan amendment.

Basically, the plan changes involves reclaiming 6 acres per year instead of 10 acres. Apparently, the operator discovered further reserves during the course of reclaiming some sites on his property. In order to exploit these reserves, the operator will delay reclamation on certain sites requiring a plan change to decrease the average acreage to be reclaimed each year.

The operator has submitted renumbered pages and a new map, which I have already inserted into the existing plan.

No bond change is required because the amount of disturbed acreage (155.59 acres), will remain the same. Also the type of reclamation will not change.
